Ecommerce Class Diagram
by: Tenzin Dorjee, Hala Mesallam

ShoppingCart

*This instances will be implemented in iteration 2

+ShoppingCart()
*This class will be implemented in iteration 2

HomePage

+ scannerIn : Scanner
+ storedPrice : Integer
+ orderProducts : ArrayList<String>
+ checkIfBuy : boolean

+ HomeOption : String

ProductPage

-Shippingcost:double
-color:String
-Productavailability:String
-orderProducts:ArrayList<String>

+ProductPage()
+getShippingcosts() : double
+getColor() : String
+Productavailability()
+getOrderProducts() : ArrayList<String>

Buying

*Instance will be implemented in the second iteration

*This class will be implemented in iteration 2

Selling

- name :String
- price :String
- category :String
- size : String
- color : String
- datePosted : String

+ Selling()
+ getList() : ArrayList<String>
+ getName() : String
+ getPrice() : String
+ getSize() : String
+ getCategory() : String
+ getColor() : String
+ getDatePosted() : String

Main

- main:

*This class will continue to implemented as we go through the next iterations
